

LXF II-370×125

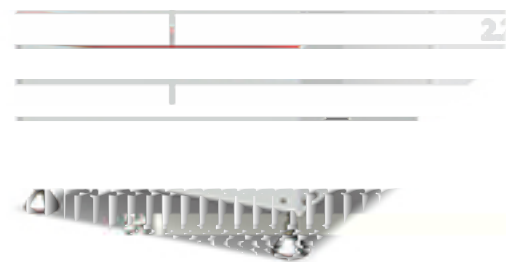

单头刀形铣床 Single Head Copy Router

[性能特点]

- 用于铝门窗幕墙型材的各类型孔、槽等的铣削加工。
- 本机结构紧凑，造型美观，体积小，型材夹紧和电机启动均采用气压控制。
- 靠模调整更换简单，加工精度高，连续加工，操作简单安全。

[Product Features]

- It is used for processing several types of holes, grooves and water-slots on aluminum and PVC windows & doors or curtain walls.
- It has the features of compact structure, nice design, smart volume and the air pressure controls the starting up of the motor.
- Easy replacement of the copy-routing plate, large cutter scope, high efficiency and convenient operation achieve the continuous processing and safety operation.

④ 技术参数 Technical Parameters

输入电压	Voltage	380V 50Hz
工作气压	Operation air pressure	0.5~0.8MPa
仿形范围	Copy-routing range	370×125mm
铣刀直径	Milling cutter diameter	φ12~φ16mm
加工型材截面	Profile section	w230×h150~210mm (it depends on the length of the cutter)
机床外形尺寸	Machine size	2180×1020×1700mm(L×W×H)
转速	Rotational speed	0-12000r/min
重量	Weight	230Kg
