角生产线 Corner Crimping Production Line

[Product Features]

- 自动角加工**
自动连续给料窗体进行连续
■ Smooth feeding corner profile for continuous crimping automatically.
- 靠的约束型材，防止窗
户度**
型材进行可定位的定位
■ Innovative upper compaction and horizontal auxiliary device to press profile stably.
■ Avoid corner misalignment and ensure accuracy.
- 扁料等多种型材的组
合**
■ Innovative external positioning design to meet different corner crimping demands, such as frame, sash and other profiles.
- 通过PLC控制系统的伺服系
统，增加精度**
■ Through monitor control functions of servo system to realize auto press four corners. Increase the processing precision.
- 运行稳定性高**
■ Schneider control system to ensure machine work stable and reliable.
- 自主开发的控制软件，
提高工作效率**
■ It adopts windows system industrial control computer and install independent research and development industrial software support for the input of a variety of profile parameters.
- 整体调换节省时间，加
快生产速度**
■ It adopts high-precision linear guide rail and ball screw to ensure smooth working and unique precision.
- 数字化工厂系统。**
■ It adopts integrated type profile crimping system according to the profile of custom made.
- Optional: bar code printer for setting up E-works digital factory system**

Dimensions	Weight	Power supply	Drive motor
0.6-0.8MPa	3000kg	380V_50Hz	
700 × 450mm		0.6-0.8MPa	
Max frame dimension		2200 × 3000mm	
700 × 450mm		Rating oil pressure	15MPa
51mm		Connection seam error	≤0.15mm
11500 × 2000 × 1300mm		Weight	3000kg
